

Exercise 1 – Mocking and Stubbing

Concept

- Create fake object
- Decide what it returns

```
import static org.junit.jupiter.api.Assertions.assertEquals;
import static org.mockito.Mockito.*;
```

```
import org.junit.jupiter.api.Test;
```

```
public class MyServiceTest {
```

```
    @Test
```

```
    void testExternalApi() {
```

```
        ExternalApi mockApi = mock(ExternalApi.class);
```

```
        when(mockApi.getData()).thenReturn("Mock Data");
```

```
        MyService service = new MyService(mockApi);
```

```
        String result = service.fetchData();
```

```
        assertEquals("Mock Data", result);
```

```
    }
```

```
}
```
