

Common Classes (Use for All Exercises)

```
public class MyService {  
  
    private ExternalApi api;  
  
    public MyService(ExternalApi api) {  
        this.api = api;  
    }  
  
    public String fetchData() {  
        return api.getData();  
    }  
  
    public String fetchUser(String name) {  
        return api.getUser(name);  
    }  
  
    public void save(String data) {  
        api.saveData(data);  
    }  
  
    public void delete() {  
        api.deleteData();  
    }  
}
```
