

Exercise 2: Parameterized Logging

Step 1: pom.xml

```
<dependencies>

    <dependency>
        <groupId>org.slf4j</groupId>
        <artifactId>slf4j-api</artifactId>
        <version>1.7.30</version>
    </dependency>

    <dependency>
        <groupId>ch.qos.logback</groupId>
        <artifactId>logback-classic</artifactId>
        <version>1.2.3</version>
    </dependency>

</dependencies>
```

Step 2: Java Program

```
import org.slf4j.Logger;
import org.slf4j.LoggerFactory;

public class ParameterizedLogging {

    private static final Logger logger =
        LoggerFactory.getLogger(ParameterizedLogging.class);

    public static void main(String[] args) {

        String name = "Kowshik";
        int age = 21;
        double salary = 45000.50;

        logger.info("Employee Name : {}", name);

        logger.info("Employee Age : {}", age);

        logger.info("Employee Salary : {}", salary);

        logger.info("Employee {} is {} years old and earns {}",
```

```
        name, age, salary);  
    }  
}
```

Output

INFO Employee Name : Kowshik

INFO Employee Age : 21

INFO Employee Salary : 45000.5

INFO Employee Kowshik is 21 years old and earns 45000.5
