

Exercise 5: Timeout and Performance Testing

PerformanceTester.java

```
public class PerformanceTester {  
  
    public void performTask() throws InterruptedException {  
        Thread.sleep(1000);  
    }  
}
```

PerformanceTesterTest.java

```
import static org.junit.jupiter.api.Assertions.assertTimeout;  
  
import java.time.Duration;  
  
import org.junit.jupiter.api.Test;  
  
public class PerformanceTesterTest {  
  
    @Test  
    public void testPerformance() {  
  
        PerformanceTester tester = new PerformanceTester();  
  
        assertTimeout(Duration.ofSeconds(2), () -> {  
            tester.performTask();  
        });  
    }  
}
```
